Peru, Guatemala, India, Uruguay, and more.

WHAT IS LEGALIZATION ?

Legalization is a procedure used to authenticate public or private documents in order to use them abroad. Legalization makes it possible to produce the document in a country other than the one in which it was issued.

Several legalization procedures are used to authenticate documents, depending on the country and the type of document you wish to legalize: apostille, general legalization procedure, specific legalization procedure for certain Arab countries.

WHAT IS AN APOSTILLE ?

An apostille is a **simplified legalization** procedure used in countries that participate in the Hague Convention of 5 October 1961 (ratified by France on 22 January 1965). This procedure is used to authenticate public or private documents that need to be produced abroad.
